Manage transport. Connect fleet activity.

Bring commercial and passenger transport workflows, vehicle and driver records, and reporting into one workspace.

Plan and allocate

Requests, approvals, vehicles, trailers and driver assignments.

Coordinate shifts

Day and night drivers, allocations and deployment delays.

Connect monitoring

Compatible GPS integration, geofences and after-hours activity.

Review and export

Dashboards and reports with Excel, PDF and CSV exports where available.

Choose your starting package

Transport Essentials

Public demo uses fictional records and simulated GPS. Production integration requires customer authorization and compatibility checks.

Prices in AED, excluding applicable taxes. Hardware, sensors, SIM/data, installation and third-party GPS/API fees are separate. Custom work and extra capacity require a written quotation.
